

Cropster is the fast growing market leader in software for the specialty coffee industry with its HQ in Innsbruck. We work with farmers, exporters, importers and roasters in over 90 countries around the world. We also believe that work-life balance is more than a catch phrase, it is a part of our success. We offer fair, competitive, and transparent pay. The salary for this position is €39K gross or more and we look at factors like your experience and individual qualifications.

## Frontend / Javascript Developer (m/f/d)

Join us and be part of a great team focused on developing Cropster's expanding product line, which includes a native desktop application that helps coffee roasters, a mobile application for sensorial tasting and a comprehensive cloud application for managing and analyzing coffee related data and more.

As a frontend developer you join an international team of experienced people working on creating the best possible user experience. You will work closely with peers, product managers, designers and backend developers on services that power the speciality coffee industry. We use Ember.js in the frontend with a fully automated CI/CD pipeline to ship our code.

### Requirements

- Degree in Computer Science or a proven track record in developing non-trivial applications
- At least two years of experience, knowledge and excitement about software development with a JavaScript framework like Ember.js, React, Vue, or AngularJS
- Desire to write code that lasts for years, not months
- A strong command of written and spoken English

That said, we'd be particularly delighted to hire someone with:

- Working experience with Ember.js
- Experience with Progressive Web Apps
- Additional languages (humane and machine)

### We Offer:

- Flexible working hours with the best coffee in town
- International team and flat hierarchy with room to grow
- Recurring team activities
- Personal education budget
- Competitive salary of at least 39k EUR p.a.
